

REMARKS

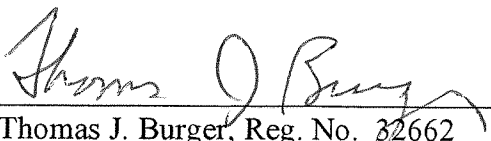

With this paper Applicants reply to the Notice of Allowance dated July 20, 2010, prior to the payment of the issue fee. That Notice of Allowance included an Examiner's Statement of Reasons for Allowance. That Statement reads as follows:

The prior art fails to neither anticipate nor render obvious the applicants' claimed invention. Specifically, the prior art fails to teach a temperature control regulator for an interior space of an aircraft that mixes engine bleed air with cooler air to the lowest nominal temperature of all of the interior spaces, and then heats the air with individual heaters before each interior section in order to achieve the desired temperature in each interior section. Thus, the applicants' invention is novel and non-obvious over the prior art

Applicants respond by respectfully stating that the claims themselves define the scope of the patent right granted on this application, not the Statement of Reasons for Allowance. Moreover, this allowed application includes 13 different allowed claims, each of which defines a different patentable invention. Each of these claims stands on its own, and its patentability does not depend upon the reasons supplied in the examiner's statement. With these comments Applicants intend no disrespect to the examiner, nor to the above-stated characterization of the claims

Applicants do not believe that any fees are due in connection with this submission. However, if any additional fees are deemed necessary to complete this communication, the Commissioner should consider this to be a request for such fees, and should charge any such necessary fees to Deposit Account No. 23-3000.

Respectfully submitted,
WOOD, HERRON & EVANS, L.L.P.
